Gemma Garcia de la Fuente

Senior Data Scientist · Retail Analytics & Forecasting

Zurich 8004, Switzerland · +41 76 269 8038

gemmagdlf@gmail.com · linkedin.com/in/gemma-garcia-de-la-fuente

PROFILE

Senior Data Scientist with 4+ years translating data into commercial decisions across retail, marketing and risk. Strong foundation in statistics and forecasting, with hands-on experience building demand-led models, monitoring stock and sales performance signals, and deploying AI-powered analytical systems into business workflows. Comfortable working at the intersection of analytics, operations and commercial teams.

EXPERIENCE

Senior Data Scientist & Product Owner

UBS Business Solutions AG · Zurich, Switzerland · Nov 2022 – Present

- Designed and maintained statistical and anomaly-detection models to identify imbalances and outliers across large, multi-source datasets — translating signals into actionable insights for operational teams.
- Led end-to-end ownership of analytical products, from KPI definition and discovery through deployment, stakeholder training and continuous iteration.
- Refactored Python-based detection pipelines to improve scalability and robustness, and acted as the bridge between technical and commercial teams — simplifying complex outputs into clear recommendations and driving adoption across regional stakeholders. Directly relevant to modern allocation and replenishment engines.
- Actively using next-generation AI tooling (LLM-powered assistants, Claude Code) to accelerate data product development.

Business Analyst

Google (via Adecco) · Zurich, Switzerland · Apr 2022 – Sep 2022

- Built a real-time Google Data Studio dashboard tracking user behaviour, conversion funnels and performance KPIs for a new YouTube feature rollout; defined success metrics with product and engineering, and presented insights to senior stakeholders to guide optimisations.

Data Analyst — Consumer Goods / Retail

KH Lloreda (KH-7) · Granollers, Spain · Jan 2021 – Apr 2022

- Built regression-based sales forecasting models for a consumer-goods brand distributed across retail channels, linking marketing spend, geography and campaign timing to revenue — foundational demand-forecasting work directly transferable to retail allocation and replenishment.
- Analysed sell-through, ROI, ROAS and CPA across channels and regions to identify where stock and investment were converting vs. under-performing, guiding media and distribution decisions.
- Partnered with commercial leadership to optimise channel distribution and quantify investment efficiency across geographies and SKUs, presenting strategic recommendations that influenced campaign investment and customer acquisition strategy at leadership level.

CORE SKILLS

Forecasting & retail KPIs: regression, time series, elasticity, anomaly detection; sell-through, stock cover, size performance, ROI/ROAS, funnel KPIs.

Tools & systems: Python (pandas, scikit-learn, statsmodels), SQL, DAX, Power BI, Google Data Studio, Excel, Git; Next.js/TypeScript; LLM-powered assistants and Claude Code.

Product & delivery: product ownership, cross-functional stakeholder management, agile delivery, KPI design, training and change adoption.

EDUCATION & LANGUAGES

MSc Financial Mgmt (UOC, 2024) · **MSc Data Science** (UOC, 2022) · **BSc Statistics** (UPC, 2019)

Languages: Catalan/Spanish (native) · **English**/French (fluent) · **Italian** (intermediate) · **German** (learning)

FEATURED PROJECT

On Allocation Studio — *retail-lake.vercel.app/products*

Self-initiated portfolio prototype of an AI-assisted allocation tool for global sportswear retail. Covers stock-health dashboards (sell-through, weeks-of-cover, at-risk SKUs), store-to-store transfer recommendations, an 8-week demand forecast with marketing-spend overlay, and a scenario simulator. *Non-commercial demo; synthetic data, not affiliated with On AG.*
